

Rebound Group offers PCB's through Delta Impact

Delta Impact is a quality supplier of all types of Printed Circuit Boards (PCBs). With 15 years experience sourcing from Asia we specialise in supplying all types of PCB including single sided, double sided, multi-layer, flexible and HDI (High Density Interconnect) boards.

The Delta Cost Advantage for PCBs includes:

- Lower prices for our customers by selecting the best fit factory for each technology and volume required
- Very competitive pricing on small volume and fast lead-time requirements
- Cost saving for our customers through lower import freight costs achieved by leveraging considerable group spend
- Cost saving and service benefit for customers with our ability to buffer or consign stock without increased prices, being part of the financially strong Rebound Group
- Cost benefit as we don't need to inflate prices to our customers on imported PCBs to subsidise an under utilised European PCB factory which many of our competitors do!

The Delta Service Advantage for PCBs includes:

- Technologies from single sided through to 36 layers catered for
- Fast turn lead times available – PCBs produced as quickly as 24 hours
- Standard production lead times from 7 working days, delivered from Asia to European customers in just 10 working days
- More than 85% of RFQ's quoted within 24 hours
- Full data processing and control through in house engineering team
- Finished product quality inspection and in house vacuum sealing facility
- Unique supply chain and inventory management solutions tailored specifically to customer demand profiles

With a well established pedigree and proven track record in supply chain logistics, Delta Impact is consistently helping its customers streamline their production and deliver real competitive advantage.
